

REMARKS

The previously submitted amendment was objected to for the "In The Specification" section not starting on its own page. This paper is a resubmission of the amendment, wherein the "In The Specification" section starts on its own page. The remainder of this paper is repeated verbatim as follows:

Claims 1-6 are pending in this application. Claims 1-6 have been objected to, but would be allowable if the objections are overcome. The finding of allowable subject matter is acknowledged and appreciated.

The drawing have been objected to as failing to comply with 37 CFR § 1.84(p)(5) because they include reference numeral 32 in FIG 2, which is not recited in the specification. Accordingly, the specification has been amended at the bottom of page 6 to now recite "aperture 32 in disk 12". The specification now properly refers to reference numeral 32 in the drawing figures. Please remove the objection to the drawing figures.

The disclosure has been objected to because of various informalities specified by the Examiner. The informalities specified by the Examiner have been corrected, and various other corrections have been made by the Applicant to ensure consistency throughout the disclosure and to provide proper antecedent basis for the claims. No new matter has been entered by this amendment.

Claim 1 has been objected to for reciting "said first joint member" and "said second joint member" without proper antecedent basis. Accordingly, "joint member" has been amended to recited: --joint assembly having a first disk and second disk-- and the recitations for "first joint member" and "second joint member" have been appropriately changed to --first disk-- and --second disk--, in agreement with the disclosure.

Claim 1 has been objected to for reciting "said second elongate body" in claim 1 without antecedent basis. Accordingly, properly antecedent basis has been provided by changing "elongate body" to "elongate member" thereabove.

Claim 1 has been objected to for reciting "said joint member" without proper antecedent basis. Such recitation has been changed to --joint assembly-- to agree with the recitation therabovE.

Please remove the objections to claim 1.

Claim 2 has been objected to for reciting "said second elongate member" without antecedent basis. With the previously discussed amendment to claim 1, this objection is overcome.

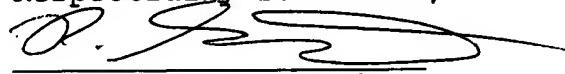

Claims 3, 4, 5, and 6 have been objected to for using the term "type", and for failing to refer back to the "cleansing head", previously recited in claim 1 to avoid a double inclusion of

elements. Appropriate correction has been made. Please remove the objections to claims 3, 4, 5, and 6.

Please enter the allowance of claims 1-6.

In view of the above, reconsideration and allowance of the pending claims are respectfully solicited. Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

Respectfully submitted,

Richard W. Goldstein
